Visual Identity Guide

Brand Logo

The URBN logo is a key element of the brand identity and should remain consistent across every touchpoint. The logo may be presented in its approved colour variations depending on the background and context, while maintaining clear visibility and legibility at all times. Consistent application helps preserve the recognisability and integrity of the URBN brand across digital and physical platforms.

Logo Guidelines

Consistent use of the URBN logo strengthens brand recognition and visual integrity. The logo must always appear in its approved form and should never be rotated, flipped, stretched, or modified with additional effects. Any misuse weakens brand consistency and should be avoided.

Do not rotate the logo.

Do not flip the logo.

Do not add effects to the logo.

Typography

Creado Display
(Bold)

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!@#\$%^&*()

Inter
(Semi Bold)

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!@#\$%^&*()

Primary Typeface
For Headlines

Secondary Typeface
For H2 & Body Text

Consistent typography strengthens brand identity and readability. Only approved fonts should be used in all communications. Avoid substituting fonts or applying excessive styling that disrupts visual consistency.

Brand Colors

The URBN colour palette is designed to create a visual identity that feels modern, confident, and approachable. Black and white provide a clean and timeless foundation, while URBN Blue introduces energy, contrast, and brand recognition. Consistent and intentional use of these colours helps create a cohesive visual experience across digital platforms, marketing materials, and communications. The approved palette should be used as the foundation for all URBN designs, with colour combinations and proportions adjusted according to the purpose and context of each design.

Primary color

HEX: #000000

Secondary color

HEX: #253DE2

Neutral color

HEX: #FFFFFF

Action Colors

Colours used for functional communication and interactive elements (buttons, links, alerts, statuses, etc). Lighter and darker variations of the action colours may be used to create emphasis, hierarchy, and visual depth across designs. These variations should remain visually consistent with the approved colour palette.

Warning

HEX: F79009

Error

HEX: #FF1100

Success

HEX: #12B76A

Primary Shades											
Gray Gray is a neutral color and is the foundation of the color system. Almost everything in UI design — text, form fields, backgrounds, dividers — are usually gray.	25	50	100	200	300	400	500	600	700	800	900
